SOME ESCAPE WINTER.
OTHERS EMBRACE IT.

BMW APPROVED COLD WEATHER WHEEL PACKAGES.
FALL/WINTER 2019.

SAFETY & POSSIBILITY IN PERFECT BALANCE.

BMW APPROVED COLD WEATHER TIRES.

BMW Approved Cold Weather Tires are made from unique rubber compounds that stay flexible in cold temperatures and help improve braking distances in winter conditions. Plus, their aggressive tread pattern maximizes contact with the road to increase traction on snow and ice.

BMW Approved Cold Weather Tires are designed, developed, and tested in collaboration with industry-leading tire manufacturers to ensure the best possible tire for your specific vehicle.

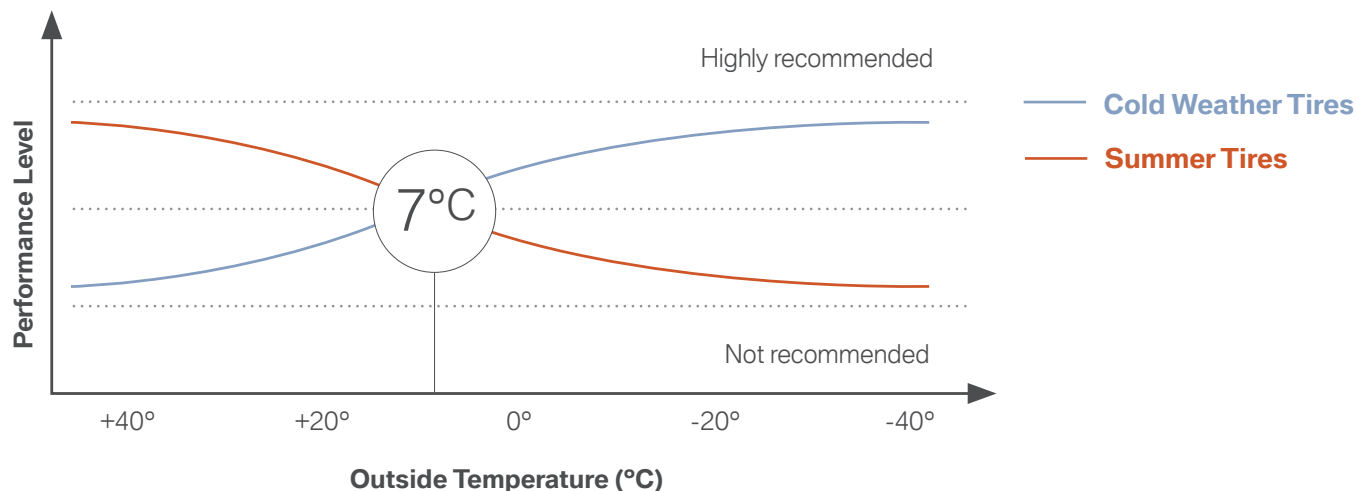

Actual tires may not be exactly as shown. *Tire pressure loss will affect handling characteristics. Consult your Vehicle Owner's Manual for limitations and restrictions. No association or affiliation with these parties is intended. All other marks are the property of their respective owners.

THE 7 DEGREE RULE.

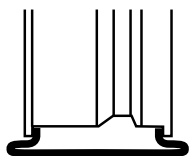

WHEN TO CHANGE YOUR TIRES.

When the temperature drops to 7 °C, it's crucial to have your BMW equipped with BMW Approved Cold Weather Tires. As a rule of thumb, cold weather tires should be installed on your vehicle well before experiencing the first signs of winter weather. Because unlike summer or all-season tires, which will harden and lose their grip, BMW Approved Cold Weather Tires remain flexible at lower temperatures, thereby maximizing contact with the road's surface throughout the entire the season.

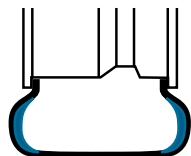

3 REASONS TO CHOOSE BMW APPROVED TIRES.

- 1 Optimized Braking Performance.**
BMW Approved Cold Weather Tires maintain their flexibility in the cold, providing shorter braking distances in harsh winter conditions so you can drive with complete confidence on all your winter journeys.
- 2 Star Approved Safety.**
The star symbol on the sidewall of a BMW Approved Tire indicates that it has been engineered and tested according to the most stringent quality standards to offer the highest degree of dynamism, ride comfort, and safety.
- 3 BMW Run-flat Technology.**
BMW Tires feature state-of-the-art Run-flat technology, retaining their form in the event of pressure loss and allowing you to drive for up to 80 km at a maximum speed of 80 km/h.*

Without Run-flat Technology

With Run-flat Technology

NOT YOUR AVERAGE WHEEL & TIRE.

Aggressive Tread Pattern

To maximize grip and reduce braking distances on wet, snowy, or icy roads.

Unique Rubber Compound

That remains flexible below 7 °C to maximize contact with the road surface.

Narrow Grooves

To trap snow in channels and ensure it doesn't accumulate on the tire's surface.

Specially Designed Blocks

Sharper edges and closer spacing allow these "cells" to enhance grip on snow and ice.

Deep Sipes

An abundance of these tiny slits enhances traction on slippery surfaces compared to all-season/summer tires.

Light Alloy Wheels

Provide high thermal conductivity for optimized brake ventilation and performance.

Specially Engineered & Precision Crafted

To perfectly match your BMW's exact safety and design specifications.

BENEFITS OF BMW APPROVED COLD WEATHER TIRES.

- Provide maximum ride and directional stability on dry, wet, snow-covered, and icy road surfaces at temperatures below 7 °C.
- Ensure significantly shorter braking distances than summer tires when roads are wet, icy, or snowy.
- Provide maximum grip on wet roads, snow, and ice.
- Available with Run-flat Technology, providing additional safety due to special reinforcements in the tire sidewall.

For X7 2019+.

BENEFITS OF BMW APPROVED COLD WEATHER TIRES.

- Provide maximum ride and directional stability on dry, wet, snow-covered, and icy road surfaces at temperatures below 7 °C.
- Ensure significantly shorter braking distances than summer tires when roads are wet, icy, or snowy.
- Provide maximum grip on wet roads, snow, and ice.
- Available with Run-flat Technology, providing additional safety due to special reinforcements in the tire sidewall.
